

COMMISSION OF THE EUROPEAN COMMUNITIES

Brussels, 24.4.2007
COM(2007) 209 final

Proposal for a

COUNCIL REGULATION (EC, EURATOM)

adjusting the weightings applicable to the remuneration and pensions of officials and other servants of the European Communities

(presented by the Commission)

EXPLANATORY MEMORANDUM

BACKGROUND TO THE PROPOSAL

Grounds for and objectives of the proposal

In accordance with Article 4 of Annex XI to the Staff Regulations, intermediate adjustments of remuneration and pensions under Article 65(2) of the Staff Regulations, taking effect on 1 January, are to be made, on the basis of information provided by Eurostat, in the event of a substantial change in the cost of living between June and December, with due allowance being made for the forecast of the change in purchasing power during the current annual reference period.

Any Commission proposal needed is to be sent to the Council not later than the second half of April.

General background

In accordance with Article 6 of Annex XI to the Staff Regulations, adjustments are to be made for all places (including Brussels) if the sensitivity threshold is reached in Brussels. If that sensitivity threshold is not reached, adjustments are only to be made for those places where the threshold is exceeded.

In accordance with Article 7 of Annex XI to the Staff Regulations, the amount of the adjustment is to be the Brussels International Index multiplied, where appropriate, by half of the specific indicator forecast if this is negative.

The specific indicator measures changes in the net remuneration, exclusive of inflation, of national civil servants in Member States' central governments. Eurostat has calculated this indicator on the basis of the information supplied by the eight Member States referred to in Article 1(4) of Annex XI.

The Brussels International Index measures changes in the cost of living in Brussels for European Community officials. Eurostat has drawn up this index on the basis of the information provided by the Belgian authorities.

The weightings are the ratio between the relevant economic parity and the exchange rate provided for in Article 63 of the Staff Regulations multiplied, if the adjustment threshold is not reached for Brussels, by the amount of the adjustment.

The economic parities for remuneration establish the purchasing power equivalence of the remuneration paid in Brussels, as the reference city, with that paid in the other places of employment. Eurostat has calculated those parities in agreement with the national statistical bodies.

The economic parities for pensions establish the purchasing power equivalence of the pension paid in Belgium, as the reference country, with that paid in the other countries of residence. Eurostat has calculated those parities in agreement with the national statistical bodies.

LEGAL ELEMENTS OF THE PROPOSAL

Summary of the proposed action

In accordance with Article 4 of Annex XI to the Staff Regulations, the purpose of the proposed action is to adjust remuneration in those places in which there has been a substantial change in the cost of living.

The change in the cost of living for Brussels, measured by the Brussels International Index, over the period June to December of the previous year, is **0.3%**.

Changes in the cost of living outside Belgium and Luxembourg during the reference period are measured by the implicit indices calculated by Eurostat. These indices are calculated by multiplying the Brussels International Index by the change in the economic parity.

The sensitivity threshold is the percentage corresponding to 7% for a twelve-month period (3.5% for a six-month period).

The implicit index applicable to remuneration exceeds the threshold in the following countries or places:

- **Estonia 5.4%.**

The implicit index applicable to pensions does not exceed the threshold in any country.

The intermediate adjustment is the Brussels International Index multiplied, where appropriate, by half of the specific indicator forecast if this is negative.

The specific indicator forecast is **-1.0%**, and thus the amount of intermediate adjustment is **-0.2%**.

The weightings are the ratio between the relevant economic parity and the exchange rate multiplied, if the adjustment threshold is not reached for Brussels, by the amount of the intermediate adjustment.

These weightings take effect on 1 January. However, for those countries or places whose implicit index is greater than 6.3%, they take effect on 16 November. For those countries or places whose implicit index is greater than 12.6%, they take effect on 1 November.

As a result, with effect from **1 January 2007**, the weightings applicable to remuneration for those countries or places exceeding the threshold are:

- **Estonia 83.4.**

The weightings applicable to pensions and transfers remain unchanged.

Legal basis

The Staff Regulations, and in particular Annex XI thereto, constitute the legal basis.

Subsidiarity principle

The proposal concerns an area that falls within the exclusive competence of the Community. The principle of subsidiarity does not therefore apply.

Proportionality principle

The proposal is consistent with the principle of proportionality for the following reasons:

- Annex XI to the Staff Regulations provides for a Council Regulation.
- The financial burden results directly from application of the method of adjustment provided for in the Staff Regulations.

Choice of instruments

Proposed instrument(s): Regulation.

Other instruments would have been inappropriate for the following reasons:

- Annex XI to the Staff Regulations provides for a Council Regulation.

BUDGETARY IMPLICATIONS

The impact of the adjustment of remuneration and pensions on administrative expenditure and revenue is detailed in the financial statement annexed hereto.
